## WELCOME TO THE **Precision Kiosk**

Are you thinking about getting kiosks for your restaurant? In this catalog, you will see the benefits that Self-Service Kiosk could have on your restaurant and be able to learn more about the models we offer!

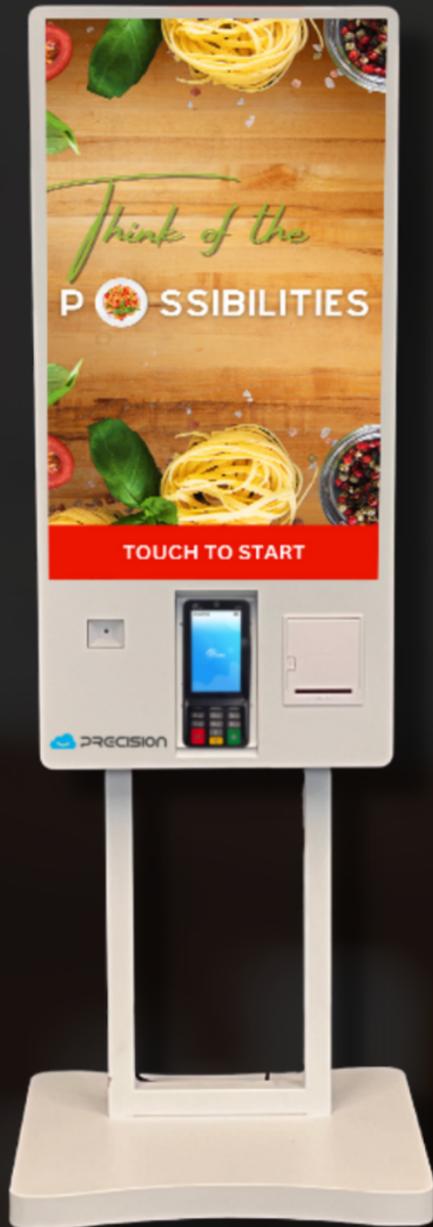

Allow customers to place an order seamlessly with our Counter, Wall, Tabletop, or Free-Standing Kiosks. Customers will save time by avoiding long lines and getting quicker service. Your restaurant will benefit from lower labor costs and increased profits during peak hours.

Promote products through video and picture advertisements and let the customer order & pay on their time with our simple-to-use interface.

Our Self-Services Kiosks are compatible with all restaurants. no matter if you are in the business of fine dining, fast casual, or a bar/nightclub.

## Free-Standing Kiosk

## Wall Kiosk

## Tabletop Kiosk

- 32 In Screen
- Comes with a credit card device

## Suggestive Upsell

Before a customer places an order our Self-Service Kiosk will use the feature Suggestive Upsell to suggest menu items the customer hasn't ordered yet. In our back-end software, we will configure the suggestive upsell and make sure we are suggesting the correct items.

If a customer orders a dinner but no appetizers, we will suggest a couple of appetizers to them.

**Orders taken on a Self-Service Kiosk are increased by 20%.**

## Waiting for Order

Along with taking orders, our Self-Service Kiosks allow customers to let your staff know they are waiting for their takeout order. When your customer puts in their phone number they also can choose to receive news and offers from your restaurant. Our Kiosks will also suggest menu items they can add to their order.

**PHONE NUMBER**

<input type="text"/>	<b>BS</b>	
1	2	3
4	5	6
7	8	9
CANCEL	0	<b>OK</b>

*I would like to receive news and offers*

## Provides Visuals

Our Self-Service Kiosks use videos and images on the main screen to entice customers to order from the kiosk while also advertising your restaurant's own dishes.

Each and every menu item on the kiosk will have an image associated with it, giving your customers a visual of what the dishes will look like.

**Did you know menu items that have an image associated to have a 6.5% increase of being ordered?**

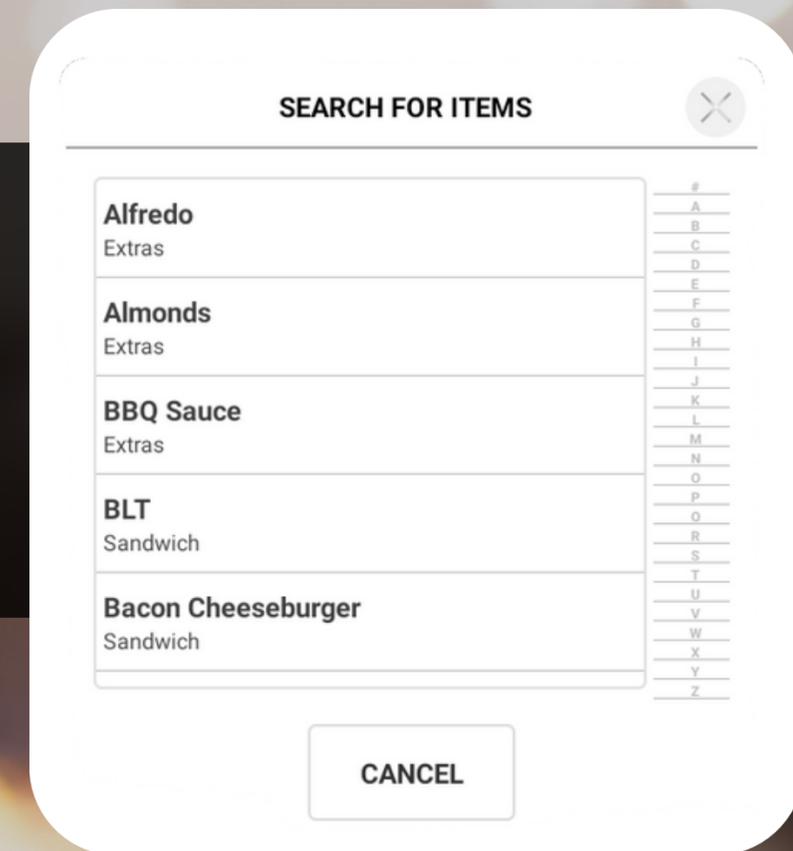

## Inactive Items

If there is ever a time when a menu item that is regularly on the menu ran out for the week, we can inactivate and reactivate it when the item is back in stock. Being inactive, the item will be greyed out and when a customer tries to order, a pop-up will tell them, **"This item is currently unavailable."**

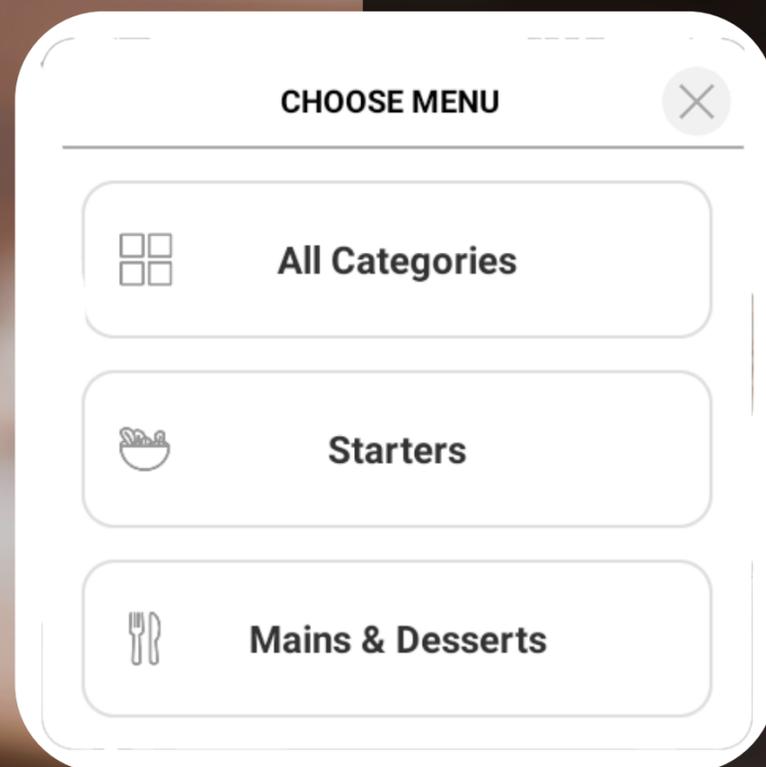

## Find Bar

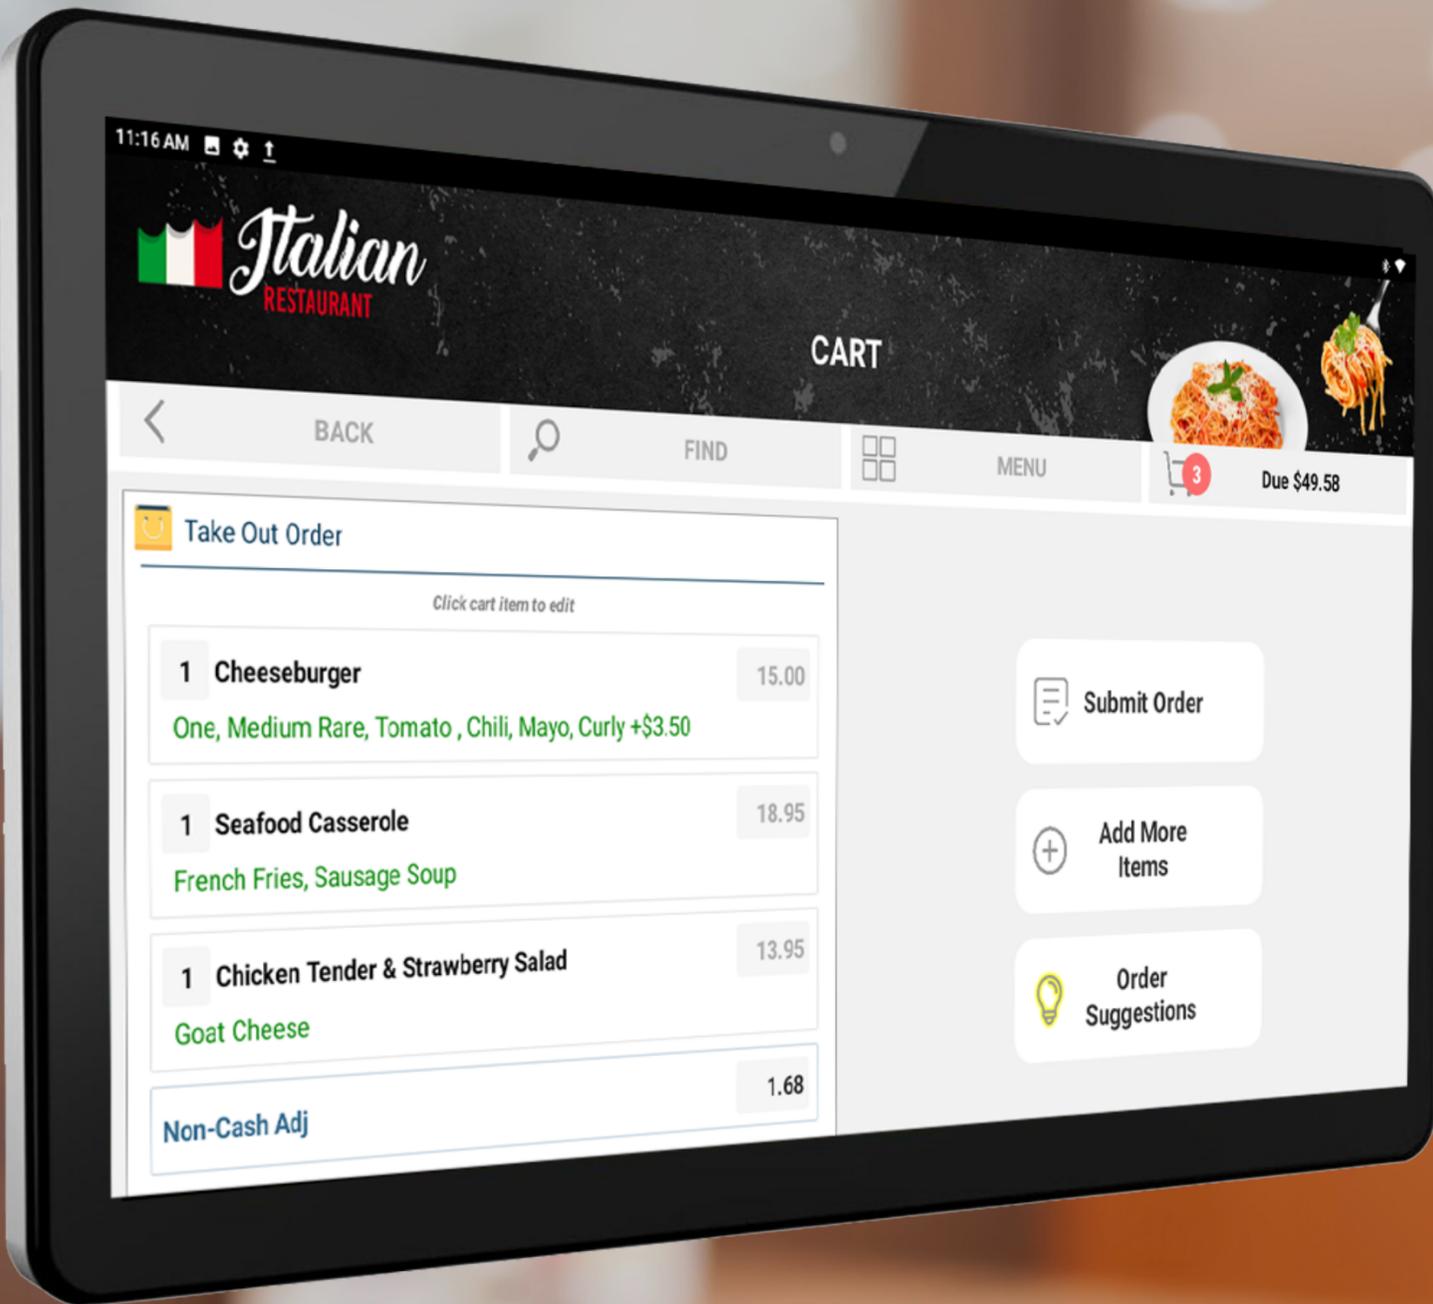

To find a certain menu item easier, customers can use our **Find Tab** and scroll through to find what they are looking for.

## Menu Bar

They can also use the **Menu Tab** to view all main dishes if they are looking for dinner options or view all starters to look for apps and salads.

## Order & Pay Here

With our Self-Service Kiosk customers will have the capability to order and pay right at the kiosks. They will have the option to either pay cash or pay with a credit card. Along with a printed receipt, customers can choose if they want a text or email receipt also.
